

Dermatology Clinical Trial Expertise

We have performed, over our combined history:

270+ CLINICAL TRIALS

30+ INDICATIONS

1,200 SITES

57,500+ PATIENTS

Each Dermatology Clinical Trial Is Unique

Diseases of the skin result in visual presentation and subjective evaluation. From ensuring consistency in rating qualitative dermatologic endpoints, to moving toward patient-centric assessments, and ensuring ICH E6 (R2) guidelines for Good Clinical Practice and high quality data—dermatology clinical trials are unique.

Synteract Offers the Experience You Need

At Synteract, we possess a deep understanding of dermatology clinical trials. With the acquisition of dermatology specialist CRO Cu-Tech in 2018, we further strengthened [our commitment to support of dermatology](#) drug development, and formed the leading dermatology CRO having established long-standing strong relationships with clients and investigators; and we have experience and knowledge across indications.

Having completed more than 270 dermatology studies, we are uniquely qualified to provide targeted guidance on developing dermatologic products and technology across numerous indications including psoriasis, atopic dermatitis, acne, alopecia, skin cancer, and numerous others, as well as skincare products. With five Centers of Development—staffed by specialists in dermatology, oncology, rare and orphan, neuro degenerative, and pediatrics (all TAs)—we can put together cross-functional teams that meet the specific needs of your study, across other areas of therapeutic demand.

Our dermatology knowledge is proven across more than 30 indications and includes considerable depth in Atopic Dermatitis, Acne, Alopecia, Eczema, Melanoma, and Psoriasis.

INDICATIONS	INDICATIONS
Acne	Nevoid Basal Cell Carcinoma Syndrome
Actinic Keratosis	Onychomycosis
Ataxia-Telangiectasia	Pemphigus Vulgaris
Atopic Dermatitis	Pigmentation Disorders
Basal Cell Carcinoma	Prurigo Nodularis
Cosmetic / Hair	Psoriasis
Cutaneous Abscess	Rosacea
Dermal Fillers	Seborrheic Dermatitis
Folliculitis	Skin Grafting
Genital Warts	Skin Infection
Glabellar Rhytides	Subcutaneous Fat
Head Lice	Tinea Pedis
Hyperhidrosis	Wound Healing
Malignant Melanoma	Other*
Nephrogenic Systemic Fibrosis	

* Stand-alone services such as ISS/ISE, Data Management, Biostats, etc. where no indications specified

Our robust strategies and capabilities will help you to meet stringent timelines, while addressing your clinical study objectives. Drawing on strong relationships with clients and investigators, we leverage sites with the ability to administer critical scale, and enable rapid enrollment of quality study subjects. We propose an operational strategy that maximizes processes and cost efficiencies across your program.

Extensive Expertise

With extensive Phase I–Phase IV dermatology clinical trial expertise (as well as expertise in rare and pediatrics), we can help you operationalize part or all of your trial, including:

- Preliminary feasibility for site and country assessment and strategy / sites knowledge
- Regulatory submissions expertise
- Patient recruitment and enrollment
- Clinical monitoring and site management
- Investigator/rater training
- Data management and biostatistics nuances for dermatology trials
- Focused program management

About Synteract

Synteract is an innovative, full-service CRO supporting biopharma companies across all phases of drug development to help bring new medicines to market. Synteract has conducted 4,000 studies on six continents and in more than 60 countries, working with more than 26,000 investigative sites and 750,000 patients. It has contributed to more than 240 product approvals. Synteract offers a notable depth of expertise in oncology, general medicine, dermatology, and neuroscience indications, as well as rare and orphan, pediatric, and immunotherapy studies.
