

 Synteract<sup>®</sup>

## OUR HISTORY

We are proud of the unique history that has led us to become the full-service, international CRO we are today.

**Since 1987**, Synteract has provided support to our clients in all phases of clinical development, across multiple therapeutic areas.

Our standards of integrity and reliability have been mainstays throughout our history, as proven by our established track record of repeat and referral clients. Our **“Shared Work. Shared Vision.”** approach ensures that you have a partner who will provide the complementary support and expertise you need to deliver tomorrow’s treatments to the patients who need them.

## OUR SERVICES

“Shared Work – Shared Vision” is the philosophy behind the way we do business. It’s a promised standard underlying our full suite of CRO services that includes consulting expertise, mentoring, custom planning, and collaborative support from a team of experts who understand your needs.

**Biostatistics**

**Project Management**

**Safety Services**

## OUR MISSION

# Bringing medicines to market.

At Synteract we collaborate with clients to develop a better future for patients by bringing our expertise to clinical development through the commitment of our employees. Our deep culture around service means we tailor an approach to fit your specific project needs, offering guidance across the spectrum of Phase I – IV clinical studies.

## OUR APPROACH

We offer both standalone and full-service programs, depending on your needs. We follow efficient processes to provide timely results.

### 1 **We increase the efficiency**

of clinical trials through the best combination of our expertise, technology and execution.

2 **We streamline trials** with the guidance, scale and processes you need to conduct efficient drug development, globally.

### 3 **We offer clear advice and**

**clear data** to mitigate risk, enhance visibility of the project, and bring you to decision points faster.

### 4 **Our fully-committed**

**support** delivers maximum value to our customers, taking time and cost out of drug development.

## OUR CLIENTS

### **Biotech and Pharmaceutical Companies**

We offer a solid understanding of the clinical development process particularly for virtual, emerging, and mid-sized biopharma companies.

### **Medical Device Trials**

Our business processes and expert staff help us be efficient and cost-effective, while providing a personal approach to the resource challenges you face.

### **Specialty Segments**

We have broad experience guiding companies in drug, diagnostic and device trials for a wide range of therapeutic areas, including immunotherapy and innovative treatments.
